

About DIS

DIS, Danish Interpretation Systems is one of the world's leading brands of advanced conference electronics. DIS provides complete system solutions of advanced electronic conference products to the global meeting industry on a permanent or rental supply basis. Conference Microphone and Discussion Systems, Simultaneous Interpretation and Translation Systems, Language Distribution Systems, Conference Voting and Audience Response Systems. DIS is engaged in product development, manufacturing and worldwide sales and has 50 years of experience in serving global clients in the meeting and communication industry. The DIS products today are the result of decades of accumulated know-how combined with the usage of the latest available analogue and digital technologies. DIS is a subsidiary of the Danish company Informationstechnik Scandinavia Group and is represented through a global partner network in more than 60 countries. DIS offices are to be found in Copenhagen, Aarhus, Malmö, Stockholm, Oslo, Brussels, Bangkok and Dubai.

For more information visit www.dis.cc

For many years DIS has delivered conference and simultaneous interpretation systems to parliaments, county chambers, town halls, national banks, universities, and international organisations such as NATO, UN, WHO, and IMF in addition to conference centres and hotels all over the world. Our reference list includes some of the most prestigious installations throughout the world.

The CIE 9000 series has been installed all over the world for nearly 10 years – combining top quality at a very competitive price. The interpretation system is based on advanced technology and more than a thousand installa-

tions worldwide prove that know-how and experience has resulted in equipment with unequalled performance.

Many rental companies throughout the world use the CIE 9000 equipment, as it is easy to connect and very user-friendly. It meets typical requirements from hotel conference centres, A/V rental companies, press

centres, events organisers, etc., where flexibility and ease of use is essential for the work of interpreters.

DIS and our partners make small stand-alone systems and large scale turn key installations all over the world. The CIE 9000 may be table-top mounted or fixed installed in order to make the system fit almost all applications.
